EXPERIENCE

Junior Engineer – XR Development

Hema Enterprises Private Limited 01/2024 – 07/2026

- Developed and delivered interactive VR, AR, and XR applications using Unity and C# for training, simulation, and interactive experiences.
- Implemented gameplay systems, UI workflows, object interactions, animations, timelines, and application logic.
- Developed and optimized applications for Meta Quest, Android, PC, and WebGL platforms.
- Worked with XR Interaction Toolkit, Meta XR SDK, passthrough, lighting, and performance optimization.

PROJECTS

LOTO VR Training

- Developed an interactive industrial safety training application using Unity and C#.
- Implemented guided workflows, equipment interactions, task logic, UI systems, and user feedback for safety procedures.
- Developed interactive training scenarios optimized for immersive XR experiences.

Industrial Hose Manufacturing VR Training

- Developed a Unity-based interactive training experience for industrial manufacturing workflows.
- Implemented equipment interactions, guided procedures, UI systems, and interactive learning sequences.
- Created real-time 3D environments and optimized interactions for XR deployment.

AI-Powered AR Virtual Try-On

- Implemented UI and interaction systems for a PC-based AR virtual try-on application.
- Integrated UI workflows with AI-powered styling recommendations using the Google Gemini API.
- Improved usability through interactive UI flows and user-focused interactions.

Industrial Safety Training VR

- Developed an interactive safety training experience covering electrical hazards and emergency evacuation procedures.
- Implemented scenario-based interactions, guided workflows, UI systems, and training logic.
- Integrated animations, timelines, environmental elements, and interactive events to create immersive training scenarios.

Fly Away

- Developed a 2D side-scrolling endless runner game using Unity and C#.
- Implemented player movement, obstacles, gameplay mechanics, animations, score tracking, menus, and game states.

SUMMARY

Game Developer with 2+ years of experience developing interactive applications using Unity and C#. Experienced in gameplay programming, UI systems, animation, XR interactions, and real-time 3D application development across PC, Android, WebGL, and Meta Quest.

Hands-on experience delivering 20+ interactive projects across industrial training, simulation, VR, AR, and game development, with a strong interest in creating engaging real-time interactive experiences.

SKILLS

Engine

Unity 3D, URP, HDRP

Programming

C#, Gameplay Programming, Game Logic

Game Development

Gameplay Systems, UI, Animation, Timeline, VFX/EFX, Lighting, Light Baking, Optimization

XR Development

XR Interaction Toolkit, Meta XR SDK, VR Interaction, Passthrough

Platforms

Meta Quest, Android, PC, WebGL

Tools

Visual Studio, VS Code, Git, Blender (Basic), Microsoft Office, Google Docs

EDUCATION

Bachelor of Engineering (B.E.)

IFET College of Engineering

2019 – 2023
